## SHEAR SLAYER SERIES

Ideal for Scrap Metal, Aluminium, Tyres and White Goods Shredding

- Designed to process the most rugged & toughest of applications
- Volume reduction
- Uniform piece sizing
- Massive application flexibility
- Minimum running / maintenance costs
- Small footprint
- High torque, twin shaft slow speed shredding solution

## OPTIONS

- Various shaft configurations
- Static / Hook lift
- Basket Chamber (Screen)
- Magnets (Overband / Magnetic Head Drum)
- Extended Hopper
- Reversible fan
- Extended Conveyor

## APPLICATIONS

- Transfer Station pre-shredding
- Volume Reduction
- Maximising Landfill Utilisation
- Wood processing
- Grinder pre-shredding
- Demolition
- Scrap Yards

## FEATURES

- Intelligent Self-Protecting control system
- On-board load sensing diagnostics
- Unique shaft reversing function (while shredding)
- Unparalleled efficiency
- Replaceable Shaft Tools
- User-friendly Windows based control system
- Lowest maintenance cost machine on the market
- Huge power unit accessibility
- Low noise emissions
- Full radio remote control

## MATERIALS

- C & D (construction & demolition)
- Commercial and industrial waste
- Truck & Agricultural Tyres (including rims)
- White household goods (Washing Machines, microwaves etc.)
- Scrap Metal
- Cast Metal
- Aluminium
- Mattresses
- Paper & Cardboard waste
