SHREDDER SERIES

SLAYER • SLAYER XL

- High torque slow speed shredding solution
- Processes a range of difficult materials
- High capacity volume reduction
- Uniform piece sizing
- Massive application flexibility
- Minimum running / maintenance costs
- Small footprint

OPTIONS

- Various shaft configurations
- Track / Wheel / Static / Hook lift
- Magnets
- Reversible fan
- Dust suppression
- Automatic greasing

APPLICATIONS

- Transfer Station pre-shredding
- High capacity Volume Reduction
- Maximising Landfill Utilisation
- Wood processing
- Grinder pre-shredding
- Demolition
- Intricate piece sizing

FEATURES

- Intelligent Self-Protecting control system
- On-board load sensing diagnostics
- Unique shaft reversing function (while shredding)
- Unparalleled efficiency
- Huge stockpile capacity
- User-friendly Windows based control system
- Lowest maintenance cost machine on the market
- Huge power unit accessibility
- Remote control tipping hopper
- Low noise emissions
- Full radio remote control

MATERIALS

- All types of wood (railway sleepers / pallets)
- C & D (construction & demolition)
- Green waste (including grass / trees / stumps)
- Domestic and household waste
- Commercial and industrial waste
- Tyres (including rims)
- White household goods
- Paper and cardboard (including paper rolls)
- Mattresses
- All plastics (including wind turbine blades)
