

Innovation at Work

# FREEFLOW 186

- The EDGE FreeFlow Screen allow for two screening operations in one unit.
- Processed un-prescreened material via the robust scalping screen and fine screening of difficult to screen material via the flip flow bottom deck.
- Provides a highly efficient screening solution for sticky, moist materials with a high percentage of fines.
- Eliminates screen plugging and blockages.
- Ability to run 10% faster than competing flip flow screens.
- Eliminates screen plugging and blockages.
- Ability to handle a wide range of materials.

## OPTIONS

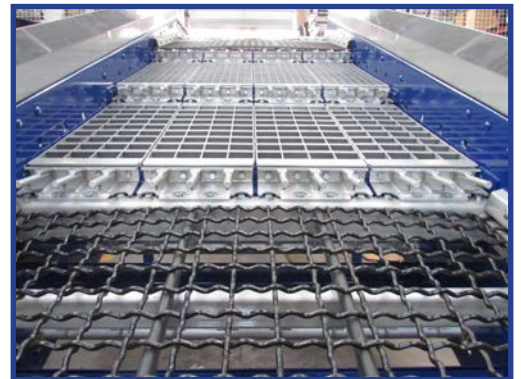

- Power-source: Hydraulic / Direct Electric
- 3D Screen
- Punch Plate or Rubber
- Woven Mesh
- Bofor Bar
- Finger Deck
- Air Knife
- Dust Extraction system

## APPLICATIONS

- Construction and Demolition Waste
- Wood
- Municipal Solid Waste
- Mulch / Organics
- Domestic and Household Waste
- Shredder Waste
- Incinerator Waste
- Glass Fines

## FEATURES

- Intelligent modular top deck system allowing numerous media types to be installed side by side.
- Most aggressive flip-flow screen on the market with mat acceleration of up to 50g.
- Fastenerless bottom deck media enables for a quick exchange procedure.
- Dead areas at feed shelf and top deck cross members have been reduced to maximise screening area.
- Double-ended reversible shaft design allows for the screen to be driven hydraulically or electrically.
